

Consultant Observation and Feedback Visit

On-site, professional, data-informed consulting to support schoolwide implementation of *Responsive Classroom*

Providing educators with ongoing support is a crucial component in the multi-year process of implementing *Responsive Classroom* schoolwide. The Consultant Observation and Feedback Visit is a full-day, on-site visit by a *Responsive Classroom* educational consultant who provides observational feedback and advice on your school's next steps. During the visit, the educational consultant collects data with the online, rubric-based tool Kaleidoscope, which gathers observations of teacher practices and various nonclassroom spaces to determine schoolwide patterns and opportunities for growth.

KALEIDOSCOPE

Key Features

- Observations of up to ten classrooms and nonclassroom spaces using Kaleidoscope
- Sixty-minute debrief meeting with school leaders to summarize the observation and determine next steps
- Alignment of current school goals with *Responsive Classroom* practices and plans for ongoing professional development

Important Details

- Included in schoolwide contracts for four-day workshops
- Also available to purchase separately
- Scheduled nine to twelve weeks following the completion of the four-day training
- Includes a Quick Coaching Guide 30-pack, a one-year subscription to Kaleidoscope, and additional *Responsive Classroom* tools

Research Based

A three-year efficacy study of *Responsive Classroom* by the Curry School of Education at the University of Virginia found that teachers were more likely to use *Responsive Classroom* practices when:

- Their principal showed buy-in to the approach
- They received coaching while implementing new practices
- Their school climate offered validation and social support for trying the *Responsive Classroom* approach
